PORTFOLIO AND PROJECTS

Personal Web Portfolio

- nicholasekwom.me

My GitHub

- [Nicholas GitHub](https://github.com/Nicholas-Github)

ABC Hardware Items and Customer Tracking site:

The inventory and customer management system enables companies to efficiently handle inventory, customer data, and sales transactions without directly processing payments. It offers:

- Comprehensive inventory management for tracking, adding, and updating stock.
- Customer information management for personalized interactions.
- Point-of-sale functionality for processing transactions, generating invoices, and recording sales data.
- Scalability and flexibility to adapt to evolving business needs.

Club BAIST Project: Web-Based Golf Club Management System | [Club BAIST GitHub Repo](#)

Developed a web-based management system for Club BAIST, enhancing the automation of tee time bookings, memberships, and player scores.

- Implemented a feature where members could book tee times, manage reservations, view player scores, and update personal information; the club's staff can manage tee sheets and process memberships.
- Built with ASP.NET Core for the backend, Razor Pages for the frontend, and SQL Server for database management, ensuring reliable performance and scalability
